Built in Oman.
Built for Oman.

Innovation Technologies LLC (InTech) is an Oman-based technology company delivering cybersecurity, infrastructure, cloud, data & AI and ERP solutions to Omani enterprises, government entities, and critical infrastructure.

We combine deep local market knowledge with world-class technology partnerships to deliver tailored, enterprise-grade IT — from advisory and architecture through implementation and support, including Almandoos ERP hosted in Oman.

AT A GLANCE

Vision, Mission & Principles

VISION

A digitally secure Oman.

To be the trusted cybersecurity partner enabling Oman's national digital transformation under Vision 2040 — one resilient enterprise at a time.

MISSION

Protect what matters.

To deliver enterprise-grade cybersecurity outcomes — tailored to Omani regulation, culture, and business reality — through leading technologies and a customer-first delivery model.

OUR PRINCIPLES

Innovation

Constantly innovating to stay ahead of emerging cyber threats.

Reliability

Solutions you can trust to safeguard your most valuable assets.

Collaboration

Working closely with clients to design solutions that fit.

Anchored in Oman's regulatory landscape.

Effective cybersecurity in the Sultanate isn't generic — it's defined by national priorities, sector regulation, and a clear data-protection regime. InTech aligns every engagement to this landscape.

NATIONAL VISION

Oman Vision 2040

A diversified, knowledge-based economy where digital trust is foundational to economic transformation.

DIGITAL FRAMEWORK

Tahawul

Oman's national digital transformation programme — secure-by-design infrastructure across government and industry.

DATA PROTECTION

PDPL — Royal Decree 6/2022

Personal Data Protection Law mandating consent, breach notification, and DPO accountability for all data controllers.

NATIONAL CERT

OCERT & CBO Framework

OCERT incident reporting plus Central Bank of Oman's six-pillar cybersecurity framework for financial institutions.

Ten domains of cyber protection

From threat intelligence to AI-era defense — our solution portfolio mirrors the way modern attacks unfold.

Cyber Threat Intelligence

Continuous threat feeds, brand & attack-surface monitoring.

Security Analytics

SIEM, UEBA & analytics-driven detection at scale.

Insider Risk Management

Detect, deter and respond to risk from within.

API Security

Shield modern API estates from abuse and exfiltration.

Access Management

IAM, MFA, PAM and Zero-Trust identity foundations.

Cloud Services

Cloud-native security across AWS, Azure & private cloud.

Data Security

Classification, DLP, encryption and database protection.

Security for IT Operations

Vulnerability, patch & exposure management.

IoMT Security

Protecting medical and operational technology fleets.

AI & Cloud Security

Securing AI workloads, models and cloud-native pipelines.

Specialist testing & applied security.

IAST

Interactive Application Security Testing

Detect vulnerabilities through runtime interaction, sensor instrumentation and program observation — for high-fidelity findings inside CI/CD.

API SECURITY

Protecting your API estate

Discover, classify, monitor and defend APIs against abuse, scraping, account takeover and sensitive-data exfiltration — across legacy and modern stacks.

DAST

Dynamic Application Security Testing

Non-functional, black-box assessment that identifies exploitable weaknesses in running applications — pre-production and live.

Why InTech

01

WORKFLOW

Proactive by design.

We proactively monitor, detect and resolve issues through advanced tooling and swift response, continuously assessing systems against industry standards.

02

SOLUTIONS

Tailored, never templated.

Bespoke solutions across security, infrastructure, cloud and ERP — one partner for your business systems, including Almandoos ERP hosted in Oman.

03

TRUST

The foundation, not a feature.

Transparency and integrity are central to how we work. Clients depend on us to safeguard their data and maintain confidentiality through every engagement.

World-class technology, locally delivered.

Five anchor partners — authorised cybersecurity platforms, Spire Solutions' regional distribution of 16+ specialist vendors, and Easy System's infrastructure engineering.

Spire Solutions

Regional Value-Added Distributor

The Middle East's leading cybersecurity VAD. Through Spire, InTech delivers 16+ specialist vendors across identity, data, threat, OT and application security.

KEY VENDORS

SailPoint · CyberArk · Ping Identity · Synopsys · Cybereason · Halcyon · AlgoSec · Sectrio · Group-IB · Eviden · Cribl

Rapid7

Exposure Management & XDR

Authorised reseller for Rapid7's platform — InsightVM for vulnerability management, InsightIDR for XDR and InsightAppSec for application security testing.

KEY PRODUCTS

InsightVM · InsightIDR · InsightCloudSec · InsightAppSec

IBM Security

Enterprise Security Platform

Trusted partner for IBM's flagship security stack — QRadar SIEM, Guardium data protection, Verify identity and X-Force threat intelligence.

KEY PRODUCTS

QRadar SIEM · Guardium · IBM Verify · X-Force · Cloud Pak for Security

NeoSec

Next-Generation Cybersecurity

Born in Oman, NeoSec delivers intelligence-driven protection for critical digital assets — advanced threat intelligence, 24/7 monitoring and autonomous testing.

KEY PRODUCTS

NeoIntelligence Platform · Neo Ghost™ · Threat Hunting · MDR · Penetration Testing · Compromise Assessment · Brand Protection · DMARC

Easy System

Infrastructure & Oracle Services

Founded in 2014 with offices in Egypt, the UAE and the UK, Easy System designs and manages zero-downtime IT infrastructure, backed by 100+ certified engineers.

KEY SERVICES

Network & SD-WAN · Infrastructure Security & SOC · Cloud Migration (Azure, AWS, OCI) · Data Center · Backup & DR · 24/7 Managed Services

Our specialist vendor ecosystem

Best-of-breed technologies, organised by the security outcomes they deliver.

IDENTITY & ACCESS

- SailPoint
- CyberArk
- Ping Identity
- IBM Verify
- NeoSec Identity Protection

THREAT & RESPONSE

- Rapid7 InsightIDR
- Cybereason
- Group-IB
- IBM Qradar
- NeoSec MDR & Threat Hunting

DATA & APPLICATION

- IBM Guardium
- Synopsys
- Halcyon
- Rapid7 InsightAppSec

NETWORK & CLOUD

- AlgoSec
- Cribl
- Eviden
- Rapid7 InsightCloudSec

OT / IoT / IoMT

- Sectrio
- Specialist OT controls
- Medical-device protection

EXPOSURE MGMT

- Rapid7 InsightVM
- Attack-surface monitoring
- Threat intelligence
- Neo Ghost
- NeoIntelligence

Single accountable partner. One contract, one SLA, one local point of escalation — across the entire stack.

Engineered end-to-end.

When clients need an IT estate that's not only secure but engineered end-to-end, InTech delivers as a single accountable partner — bringing full IT consulting and engineering alongside cybersecurity.

We extend beyond pure cybersecurity into infrastructure, cloud, data, AI, and enterprise applications — all under one accountable delivery model.

BEYOND CYBERSECURITY

IT consulting & technology engineering

Designing, implementing and managing tailored digital solutions — from AI services and intelligent automation to cloud infrastructure, data analytics, and application integration. Partnering with Microsoft, AWS, IBM, Oracle, Cisco and Fortinet.

one delivery team.

Driving value across four value streams

01

Efficiency & Transformation

ITIL operations & architecture

Transform IT operations using ITIL best practice. Architecture services and cloud operation support that drive sustainable cost savings.

02

Cloud Adoption

Migrate applications & workloads

Migration planning, candidate selection and full execution to AWS, Azure and Oracle Cloud — accelerating agility and revenue growth.

03

Insights & Innovation

Analytics, AI & modern experiences

Adopt AI and analytics into the business. Create modern user experiences that unlock new revenue and enable data-driven operations.

04

Integrated Enterprise Solutions

Apps, data & middleware

Application modernization, database optimization and middleware integration — securing applications while evolving the wider stack.

Almandoos ERP — hosted in Oman

ALMANDOOS ERP

Our ERP service for the whole business

Business Modules

Accounting · Stock / Inventory · Buying · Selling · Fixed Assets · HR & Payroll · Projects · Manufacturing · Quality · Maintenance

Delivery Approach

Requirements & Discovery · System Setup · Data Migration · Training & UAT · Go-Live & Support

Packages

Starter · Business · Professional — the modules and scale that fit your organisation

HOSTED IN OMAN

Local hosting, local delivery

Oman-Based Hosting

Hosted in Oman — your business data stays in the Sultanate.

Local Implementation

Delivered by InTech — from discovery and data migration to go-live.

Training & Support

Key-user training, UAT, post-launch hypercare and operational support.

Managed Service

Implementation, hosting and support delivered as one service.

Almandoos ERP packages

Three service packages that grow with your business — from core finance and stock to manufacturing, quality and maintenance.

Starter

- Accounting
- Stock / Inventory
- Buying
- Selling
- Discovery, setup & data migration
- Training & UAT
- Go-live & hypercare support

Business

- Everything in Starter
- Fixed Assets
- HR & Payroll
- Project Management
- Discovery, setup & data migration
- Training & UAT
- Go-live & hypercare support

Professional

- Everything in Business
- Manufacturing
- Quality
- Maintenance
- Discovery, setup & data migration
- Training & UAT
- Go-live & hypercare support

How Almandoos is delivered

A five-stage implementation — from the first workshop to post-launch support — on an ERP hosted in Oman.

01
Discover

Business process mapping, gap analysis, scope definition and workflow sign-off.

02
Set Up

Instance provisioning, company configuration, user roles and module setup.

03
Migrate

Template preparation, data sanitization, import and balance verification.

04
Train & Test

Key-user training per module, plus UAT scenarios, fixes and adjustments.

05
Go-Live

Cutover, opening balances, post-launch hypercare and operational support.

Infrastructure & Security services

Architecting robust, secure foundations — across network, security, virtualization, cloud and data center.

Identity & Access Management

- IAM, MFA, VPN
- MDM, NAC
- SASE

Threat Intelligence & Risk

- TIP & threat feeds
- Brand protection
- Attack-surface management

Data Security

- Data Leakage Prevention
- Data classification
- Encryption

Security Operations

- SIEM, SOAR, NDR/EDR
- UEBA, deception
- Vulnerability & patch mgmt

Infrastructure Security

- NGFW, NIPS/NIDS
- DDoS, content filtering
- Host & APT protection

Secure Apps & Services

- WAF, DB, Email, DNS
- API & container security
- SAST / DAST

Data Science, AI & Enterprise Applications

DATA SCIENCE & AI

Analytics, ML and the cloud data estate

Enterprise & Operational Analytics

Power BI · Oracle Analytics Cloud · EPM Cloud · OTBI · Financial Reporting · BI Publisher

Visualization & Integration

Azure Pipeline · Data Visualization Cloud · Big Data

Data Lake & Autonomous BI

Azure Data Lake (ADLA) · Azure Synapse · AWS Lake Formation · Oracle Event Hub · Google BigQuery · Autonomous Analytics & DW Cloud

ENTERPRISE APPLICATIONS

ERP & custom business platforms

Oracle Stack

APEX (PaaS) · VBCS · .NET custom solutions

Oracle E-Business Suite (EBS)

Implementation · Upgrade · Migration · Support

Almandoos ERP

Implementation, customization & support — hosted in Oman

Oracle SaaS

Integration, OTBI, and extensions

Technology Support & Professional Services

Certified engineering teams, deep technology specialisation, and a complete escalation path.

Oracle Technology Services

- Functional & application services
- Database administration & maintenance
- Application technical support
- Cloud migration services
- Security & compliance services
- Performance optimization
- Disaster recovery services
- Integration services

Security & Professional Services

- Penetration testing
- Vulnerability assessments
- Forensic investigation
- Security architecture review
- Implementation services
- Migration services
- User training
- Infrastructure support

Engineering & Enterprise Support

- Premium, standard & remote support
- Certified L1 / L2 engineers
- L3 expert escalation
- Vendor escalation paths
- Highly qualified presales consultants
- Senior post-sales engineering
- Project management office
- Knowledge transfer & enablement

Infrastructure, Networking & Data Center

Beyond security — the foundational IT estate we design, build and operate across network, virtualization and data center.

Network & Infrastructure

- Network design, implementation & management
- Structured cabling & passive infrastructure
- Content filtering & segmentation
- Network behavior analytics

Virtualization & VDI

- Server virtualization
- Virtual Desktop Infrastructure (VDI)
- VDI security
- High-availability clustering

Data Center & Cloud

- Physical / passive — racks & cabling
- Logical / active — configuration & installation
- Multi-cloud strategy & migration (AWS, Azure, Oracle)
- Data center operations & support

Oracle Database & Cloud Data Center

End-to-end expertise across the Oracle technology stack — from database engineering to the cloud data center.

ORACLE DATABASE & DATA CENTER

- Oracle Exadata
- Zero Data Loss Recovery Appliance (ZDLRA)
- Oracle Enterprise Manager (OEM)
- Database Security
- High Availability & Disaster Recovery
- Performance Tuning & Optimization
- Storage & Backup Solutions

STACK — IMPLEMENTATION & MANAGEMENT

- Oracle Database & Fusion Middleware
- Oracle Cloud Infrastructure (OCI)
- Oracle Integration Cloud
- Oracle Analytics Cloud
- Oracle EBS & ERP Cloud
- Data Migration & Management
- ERP customization
- Almandoos ERP implementation

Delivery Disciplines & Managed Services

Proven implementation practices, backed by round-the-clock managed services and a complete support package.

IMPLEMENTATION BEST PRACTICES

- Project management
- Business process analysis & re-engineering
- System design & architecture
- Custom development & integration
- Testing & quality assurance
- Deployment & rollout
- Training & knowledge transfer
- Post-implementation support

MANAGED & SUPPORT SERVICES

- Managed services — residency & SLA-backed
- 24×7×365 monitoring & response
- Security Operations Center (SOC) services
- Complete support package — design, PM, integration
- On-site / remote delivery
- Premium, standard & remote support tiers

How we deliver value

A five-stage methodology built on proven frameworks and reusable assets — from first conversation to long-term care.

01
Assess

Risk, regulatory & maturity baseline against PDPL, CBO, OCERT and ISO frameworks.

02
Architect

Reference architecture, vendor selection, and a phased target-state roadmap.

03
Implement

Certified engineers, project governance and a proven delivery factory.

04
Operate

Ongoing engineering support with L1–L3 escalation, vendor relations, and SLA-backed response.

05
Evolve

Continuous improvement, threat-led tuning and capability expansion.

OUR PROMISE

Local knowledge. **Global standards.**

Local Knowledge

Deep understanding of Oman's regulatory, cultural and economic landscape — solutions tailored to local realities, including Almandoos ERP hosted in Oman.

Proven Success

Track record of successful projects and satisfied clients — industry know-how and best practices applied with precision and excellence.

Customer-Centric

Strong, collaborative relationships at the heart of every engagement — bespoke solutions built around client business challenges.

Cost-Effective

Value without compromise on quality — efficient processes that maximize return on investment within realistic budgets.

Let's build **what's next.**

Schedule a discovery conversation. We'll map the priorities that matter to your business — from security to ERP and infrastructure — and the path to measurable results.
